

CURRICULUM VITAE

(until 2012)

He was born in 1967 in Gödöllő and completed elementary school in Tura in the County of Pest. After graduating from the Piarist Grammar School at Kecskemét in 1986, he pursued theological studies in Eger, then in Budapest and performed the compulsory military service in Hódmezővásárhely.

He started studying humanities at the Eötvös Loránd University in 1989. During his university years the spirit of the Eötvös Collegium exerted a considerable influence on him. He visited the palaeography lessons of PÁL ENGEL held there at the Ménesi street through several terms. In his professional development the tutoring of ISTVÁN FAZEKAS and the philological nature of the Latin department proved to be determining. He wrote his theses to ÁGNES R. VÁRKONYI and to TAMÁS ADAMIK.

He began comprehensive archival researches along with academic education activity (Latin language, History, from 2001 only History) in the fifth class of the university. The collection of data including the archives of Upper-Hungary aimed at the successors of Péter Pázmány, then at the prosopography of the 17th century Episcopate. He has utilized the results of this work only partially. During the systematic exploration of the archival fonds – hardly separable from the impact of the spirit of TIBOR KLANICZAY and the proximity of the Institute of Literary Studies of the Hungarian Academy of Sciences – he paid a special attention to the collection of literary history data. His first publications based on these (about Pázmány and Zrínyi). His participation in the critical edition of the correspondence of István Gyöngyösi together with JÓZSEF JANKOVICS rooted in it.

His archival researches were expanded when he was a Ph.D. scholarship holder, between 1994 and 1997 with roman, Italian, Austrian and Moravian collections. The relations of the Holy See and Hungary got to the focus of his attention in 1998 when he did not have a job. His first major studies were written in this subject. He defended his Ph.D. thesis from the 17th century aspects of this topic in the spring of 2001. His supervisor was ÁGNES R. VÁRKONYI. During his Ph.D. scholarship-holder period he edited and published a volume containing 60 studies that helped the formation of his principles about the theory and practice of editing and publication, moreover, deepened his knowledge about Hungarian professional communities of history.

His activity as a full-time Latin lecturer that started in 1999 at the Péter Pázmány Catholic University, Faculty of Humanities terminated in the year of the defence of his Ph.D. He was appointed as a senior lecturer in the Institute of History of the same university in the autumn of 2001 then he was promoted to a docent in 2007. The scientific impact of his teaching activity – that took together with the seminars and consultations in the doctoral school 16–18 hours a week – is shown by his Ph.D. supervisions, theses that were published as studies and archival researches of his students and Ph.D. students conducted in Hungary and abroad. He habilitated in September 2012 at the University of Szeged from Literary and Cultural Studies thanked to the interdisciplinary nature of his historical researches. The chairman of the habilitation committee was MIHÁLY BALÁZS and there was among its members also LÁSZLÓ SZÖRÉNYI.

A considerable portion of the results of his Ph.D. thesis, that was handled in relatively late as a result of the diversity of the collection of material and the organizational challenges of the researches carried out abroad, had already been published – at least as regards the 17th century – in professional journals before the defence. The synoptic vision of the late medieval and 16th century antecedents, the current history of the papacy and its international literature justified that these subjects were discussed in detail in the introduction part of his Ph.D. thesis. An important strand of his postdoctoral researches is that he developed further these parts and published them in studies and volumes (*The Baroque Papacy*, 2004). The same can be stated about the so far unpublished 17th century part of his Ph.D. dissertation from which a monograph was born (*Purpura Pannonica*, 2005). In the frame of the postdoctoral fellowship of the Hungarian Scientific Research Fund won in 2001 the continuation of basic researches and their rapid publication was essential. From these the presentation of the religious relations of Upper-Hungary concerning the 1630/1640s and the interdisciplinary exploration of the representation of Pázmány in Rome and his cryptographic Italian correspondence were outstanding. A significant momentum of his postdoctoral fellowship and his first Bolyai Scholarship was the joining in the international circulation of literature by publishing in more prestigious foreign journals and annuals.

After less than half a decade of research experience in the Vatican Archives, he realised that it would be essential the modernized renewal of the *Monumenta Vaticana Hungariae* series, the publication of which had been discontinued in 1909. Since 2002 he has subordinated all his scholarly activity to this maxim. First of all, he wrote a historiography that concentrated on the history of the Hungarian researches in the Vatican then he redacted the collection of Edgár Artner that had been intended to publish as the continuation of the *Monumenta Vaticana* by Tibor Gerevich in the 1920s. The latter offered an excellent opportunity to the immersion in Medieval palaeography. These works were published in the *Collectanea Vaticana Hungariae* series that started in 2004. Its professional publisher is the Church History Research Group of the Pázmány Péter Catholic University founded by Cardinal PÉTER ERDŐ and its publisher is the Gondolat Publishing House. The second Bolyai Scholarship between 2008 and 2011 meant a considerable assistance in the pursuing of the diverse editing and publishing work of the series that holds together the Hungarian historical researches in the Vatican Archives in the absence of a real Hungarian historical institute in Rome and that divides into two subseries with 13 volumes by now. This second support of the Hungarian Academy of Sciences gave also a background for the actual preparation for targeted research that led to the writing up of his doctoral thesis at the Hungarian Academy of Sciences

Along the professional and typographical lines of the *Collectanea Vaticana Hungariae* series he founded in 2009 the *Publikationen der Ungarischen Geschichtsforschung in Wien* together with ISTVÁN FAZEKAS (edited by the Hungarian Historical Institute in Vienna, the *Collegium Hungaricum* Wien and the Archival Delegation of Hungary in Vienna) Since then, it has been published 8 volumes in the series thanks to the present scientific director of the Historical Institute, CSABA SZABÓ. PÉTER TUSOR has participated in the works as a member of the editorial committee, occasionally as editor. In this academic enterprise his professional competence is ensured dominantly by his researches conducted regularly from 1998 in Vienna as regards the early modern age relations of Hungary and the Holy See.

He held his first lecture already in 1995 at a national scholarly conference, where he presented some of the results of his history thesis. He had to wait for the possibility to hold a similar international lecture until 2006. Then he was invited to talk about the Hungarian relations of the *Augustineum* that was a special institute for the education of the ecclesiastical elite of the Austro-Hungarian Monarchy in Vienna. His lecture became the starting point of joining in an extensive international project and an expanding science organising activity (*Bischofslexikon der Habsburger Monarchie 1804–1918; Die ungarischen Alumni des Wiener Frintaneums 1817–1918. Ein biographisches Lexikon*). The relatively late beginning of participation as a lecturer at international conferences is compensated by giving professional advice to the workers of the Vatican archives and library as regards Hungarian questions. This manifold working relationship that was woven organically became the basis of the *Gli archivi della Santa Sede ed il Regno d'Ungheria* international conference organised by him in 2007 in Rome. The professional cooperation with the Research Centre of the University of Viterbo (CeSPoM) continues in the frame of an international cooperation program of the Hungarian Scientific Research Fund from 2010. The next significant station of the collaboration will be the “*The Papacy and the local Churches (XVIth–XXth centuries)*” international workshop in May of 2013 in Budapest with 7 well-known researchers from 17 countries.

The numerical dimensions of his academic work are shown by 3 Hungarian and 1 English monograph, 4 volumes of Latin and Italian source publication and 7 edited books. From the latter 2 entirely and 1 partially was published in a foreign language. The number of his academic studies is 99. From them 18 was written in foreign language and were published in such prestigious professional journals and annuals as the *Archivum Historiae Pontificiae*, *Quellen und Forschungen aus Italienischen Archiven und Bibliotheken*, *Römische Quartalschrift für Christliche Altertumskunde und Kirchengeschichte*, *Römische Historische Mitteilungen*, *Dall'Archivio Segreto Vaticano. Miscellanea di testi, saggi e inventari*, *Miscellanea Bibliothecae Apostolicae Vaticanae*. Furthermore, he compiled 3 academic notes. The number of his scholarly lectures at conferences is altogether 30. The stages of his lectures at international conferences are Rome, Vienna, Budapest, Piliscsaba, Madrid, Praha and Cluj. At the latter he was entrusted with the organisation of one of the history panels of the 7th Hungarology Congress. He was also asked to organise international church historical symposiums in Esztergom in 2007 and 2010. The professional cooperation partners were the University Babeş–Bolyai and the *Internationale Gesellschaft für Konziliengeschichtsforschung*. His scholarly researches were supported along with the Hungarian Academy of Sciences and the Hungarian Scientific Research Fund several times by the *Österreichische Akademische Austauschdienst*, the Italian interstate scholarship of the Scholarship Committee and the Eötvös Scholarship of the Hungarian State.
